1 Inferring calendar event attendance
Elizabeth Mynatt, Joe Tullio
January 2001 **Proceedings of the 6th international conference on Intelligent user interfaces IUI '01**
Publisher: ACM Press
Full text available: pdf(351.42 KB) Additional Information: full citation, abstract, references, citings, index terms

The digital personal calendar has long been established as an effective tool for supporting workgroup coordination. For the new class of ubiquitous computing applications, however, the calendar can also be seen as a sensor, providing both location and availability information to these applications. In most cases, however, the calendar represents a sequence of events that people could (or should) attend, not their actual daily activities. To assist in the accurate determination of user where ...

Keywords: bayesian networks, calendars, context-aware, groupware calendar systems, informal meeting scheduling, visualizing uncertainty

2 Personal information management: Digital memories in an era of ubiquitous computing and abundant storage
Mary Czerwinski, Douglas W. Gage, Jim Gemmell, Catherine C. Marshall, Manuel A. Pérez-Quiñones, Meredith M. Skeels, Tiziana Catarci
January 2006 **Communications of the ACM**, Volume 49 Issue 1
Publisher: ACM Press
Full text available: pdf(845.97 KB) html(27.27 KB) Additional Information: full citation, abstract, references, citings, index terms

A lifetime of digital memories is possible but raises many social, as well as technological, questions.

3 DateLens: A fisheye calendar interface for PDAs
Benjamin B. Bederson, Aaron Clamage, Mary P. Czerwinski, George G. Robertson
March 2004 **ACM Transactions on Computer-Human Interaction (TOCHI)**, Volume 11 Issue 1
Publisher: ACM Press
Full text available: pdf(319.85 KB) Additional Information: full citation, appendices and supplements, abstract, references, cited by, index terms, review

Calendar applications for small handheld devices are growing in popularity. This led us to develop DateLens, a novel calendar interface for PDAs designed to support complex tasks. It uses a fisheye representation coupled with compact overviews to give the big picture in a small space. The interface also gives users control over the visible time period, as well as supporting integrated search to discover patterns and outliers. Designed with device scalability in mind, DateLens currently runs on d ...

5 Predictive modeling of web users: Why we search: visualizing and predicting user behavior

Eytan Adar, Daniel S. Weld, Brian N. Bershad, Steven S. Gribble

May 2007 **Proceedings of the 16th international conference on World Wide Web WWW '07**

Publisher: ACM Press

Full text available: pdf(775.31 KB) Additional Information: full citation, abstract, references, index terms

The aggregation and comparison of behavioral patterns on the WWW represent a tremendous opportunity for understanding past behaviors and predicting future behaviors. In this paper, we take a first step at achieving this goal. We present a large scale study correlating the behaviors of Internet users on multiple systems ranging in size from 27 million queries to 14 million blog posts to 20,000 news articles. We formalize a model for events in these time-varying datasets and study their correla ...

6 Key management and key exchange: A temporal key management scheme for secure broadcasting of XML documents

Elisa Bertino, Barbara Carminati, Elena Ferrari

November 2002 **Proceedings of the 9th ACM conference on Computer and communications security CCS '02**

Publisher: ACM Press

Full text available: pdf(242.89 KB) Additional Information: full citation, abstract, references, citings, index terms

Secure broadcasting of web documents is becoming a crucial need for many web-based applications. Under the broadcast document dissemination strategy a web document source periodically broad-casts (portions of) its documents to a possibly large community of subjects, without the need of explicit subject requests. By secure broadcasting we mean that the delivery of information to sub-jects must obey the access control policies of the document source. Since different subjects may have the right to ...

Software Reliability Engineering: A Roadmap
Michael R. Lyu
May 2007 **2007 Future of Software Engineering FOSE '07**
Publisher: IEEE Computer Society
Full text available: pdf(259.92 KB) Additional Information: full citation, abstract, index terms

Software reliability engineering is focused on engineering techniques for developing and maintaining software systems whose reliability can be quantitatively evaluated. In order to estimate as well as to predict the reliability of software systems, failure data need to be properly measured by various means during software development and operational phases. Moreover, credible software reliability models are required to track underlying software failure processes for accurate reliability analysis ...

8 Escaping the software tar pit: model clashes and how to avoid them
Barry Boehm
January 1999 **ACM SIGSOFT Software Engineering Notes**, Volume 24 Issue 1
Publisher: ACM Press
Full text available: pdf(2.06 MB) Additional Information: full citation, abstract, citings, index terms

"No scene from prehistory is quite so vivid as that of the mortal struggles of great beasts in the tar pits… Large system programming has over the past decade been such a tar pit, and many great and powerful beasts have thrashed violently in it…"Everyone seems to have been surprised by the stickiness of the problem, and it is hard to discern the nature of it. But we must try to understand it if we are to solve it."Fred Brooks, 1975Several recent books and reports have confi ...

9 Risks to the public: Risks to the public in computers and related systems
Peter G. Neumann
May 2004 **ACM SIGSOFT Software Engineering Notes**, Volume 29 Issue 3
Publisher: ACM Press
Full text available: pdf(128.46 KB) Additional Information: full citation

10 Pilots of the future: human or computer?
Alan B. Chambers, David C. Nagel
November 1985 **Communications of the ACM**, Volume 28 Issue 11
Publisher: ACM Press
Full text available: pdf(3.30 MB) Additional Information: full citation, abstract, references, citings, index terms

As more and more automation is incorporated in aircraft, the essential question becomes one of autonomy: Should the automated system serve as the human pilot's assistant, or vice versa?

11 Shared family calendars: Promoting symmetry and accessibility
Catherine Plaisant, Aaron Clamage, Hilary Browne Hutchinson, Benjamin B. Bederson, Allison Druin
September 2006 **ACM Transactions on Computer-Human Interaction (TOCHI)**, Volume 13 Issue 3
Publisher: ACM Press
Full text available: pdf(2.91 MB) Additional Information: full citation, abstract, references, index terms

We describe the design and use of a system facilitating the sharing of calendar information between remotely located, multi-generational family members. Most previous work in this area involves software enabling younger family members to monitor their parents. We have found, however, that older adults are equally if not more interested in

the activities of younger family members. The major obstacle preventing them from participating in information sharing is the technology itself. Therefore, we ...

12 Web technologies and applications (WTA): Context-aware filtering for collaborative web systems: adapting the awareness information to the user's context

Manuele Kirsch-Pinheiro, Marlène Villanova-Oliver, Jérôme Gensel, Hervé Martin
March 2005 **Proceedings of the 2005 ACM symposium on Applied computing SAC '05**
Publisher: ACM Press

Full text available: pdf(252.79 KB) Additional Information: full citation, abstract, references, citings, index terms

We propose a context-based filtering process which aims at adapting the awareness information delivered to mobile users by collaborative web systems. This filtering process relies on a model of context which integrates both a physical and an organizational dimensions and allows to represent the user's current context as well as *general profiles*. These profiles are descriptions of user's potential contexts and express the awareness information filtering rules to apply when the user's curre ...

Keywords: awareness support, collaborative web systems, context-aware computing, user adaptation

13 Probabilistic temporal databases, I: algebra

Alex Dekhtyar, Robert Ross, V. S. Subrahmanian
March 2001 **ACM Transactions on Database Systems (TODS)**, Volume 26 Issue 1
Publisher: ACM Press

Full text available: pdf(878.03 KB) Additional Information: full citation, abstract, references, citings, index terms

Dyreson and Snodgrass have drawn attention to the fact that, in many temporal database applications, there is often uncertainty about the start time of events, the end time of events, and the duration of events. When the granularity of time is small (e.g., milliseconds), a statement such as "Packet p was shipped sometime during the first 5 days of January, 1998" leads to a massive amount of uncertainty (5×24×60×60×1000) possibilities. A ...

14 Participatory design: "LINC-ing" the family: the participatory design of an inkable family calendar

Carman Neustaedter, A. J. Bernheim Brush
April 2006 **Proceedings of the SIGCHI conference on Human Factors in computing systems CHI '06**
Publisher: ACM Press

Full text available: pdf(1.11 MB) Additional Information: full citation, abstract, references, index terms

Families must continually organize, plan, and stay aware of the activities of their households in order to coordinate everyday life. Despite having organization schemes, many people still feel overwhelmed when it comes to family coordination. To help overcome this, we present our research efforts on LINC: an inkable family calendar designed for the kitchen. LINC was developed using a participatory design process involving interviews, paper prototyping, and a formative evaluation. Our work outlin ...

15 Phone-based CSCW: tools and trials

Paul Resnick
October 1993 **ACM Transactions on Information Systems (TOIS)**, Volume 11 Issue 4
Publisher: ACM Press

Full text available: pdf(1.69 MB) Additional Information: full citation, abstract, references, citings, index terms

Telephones are the most ubiquitous, best-networked, and simplest computer terminals available today. They have been used for voice mail but largely overlooked as a platform for asynchronous cooperative-work applications such as event calendars, issue discussions, and question-and-answer gathering. HyperVoice is a software toolkit for constructing such applications. Its building blocks are high-level presentation formats for collections of structured voice messages. The presentation formats ...

16 Frontmatter (TOC, Letters, Open Source Software (OSS) Patent Search Engine, Calendar of Events, Workshop and Conference Information)

ACM SIGSOFT Software Engineering Notes staff
March 2005 **ACM SIGSOFT Software Engineering Notes**, Volume 30 Issue 2
Publisher: ACM Press
Full text available: pdf(564.92 KB) Additional Information: full citation, index terms

17 Developing calendar visualizers for the information visualizer

Jock D. Mackinlay, George G. Robertson, Robert DeLine
November 1994 **Proceedings of the 7th annual ACM symposium on User interface software and technology UIST '94**
Publisher: ACM Press

Full text available: pdf(1.42 MB) Additional Information: full citation, abstract, references, citings, index terms

The increasing mass of information confronting a business or an individual have created a demand for information management applications. Time-based information, in particular, is an important part of many information access tasks. This paper explores how to use 3D graphics and interactive animation to design and implement visualizers that improve access to large masses of time-based information. Two new visualizers have been developed for the Information Visualizer: 1) the Spiral Calendar ...

18 Simulation-based capacity planning and scheduling with AutoSched

Michael B. Thompson
December 1993 **Proceedings of the 25th conference on Winter simulation WSC '93**
Publisher: ACM Press
Full text available: pdf(743.93 KB) Additional Information: full citation, references, citings

19 An approach to object-oriented discrete-event simulation of manufacturing systems
John P. Shewchuk, Tien-Chien Chang
December 1991 **Proceedings of the 23rd conference on Winter simulation WSC '91**
Publisher: IEEE Computer Society
Full text available: pdf(982.11 KB) Additional Information: full citation, references, citings, index terms

20 Nomadic radio: speech and audio interaction for contextual messaging in nomadic environments
Nitin Sawhney, Chris Schmandt
September 2000 **ACM Transactions on Computer-Human Interaction (TOCHI)**, Volume 7 Issue 3
Publisher: ACM Press
Full text available: pdf(648.76 KB) Additional Information: full citation, abstract, references, citings, index terms

Mobile workers need seamless access to communication and information services while on the move. However, current solutions overwhelm users with intrusive interfaces and ambiguous notifications. This article discusses the interaction techniques developed for Nomadic Radio, a wearable computing platform for managing voice and text-based messages in a nomadic environment. Nomadic Radio employs an auditory user interface, which synchronizes speech recognition, speech synthesis, nonspeech audio ...

Keywords: adaptive interfaces, contextual interfaces, interruptions, nonspeech audio, notifications, passive awareness, spatial listening, speech interaction, wearable computing
